Angelo Joseph Villaluz

I am willing to take every opportunity I have to work with the company. I have flexible characteristics that can easily adapt to the environment I am working on. I would take every step in solving every problem the company has with precision. I understand that every job could be difficult but I always push myself to my limits and lend whatever I have to create a meaningful impact not only to the company, but also on myself, and for the future.

Education and Qualifications

Bachelor of Science in Computer Science   Aug 2019 - Present
University of the Philippines Manila, Quezon City
